1. Linga Murthy

If you understand all your components, you can see very clearly every moment Big Bang and Black Hole is happening in your system.

You are the microcosm.

If you understand the Big Bang and Black Hole in the microcosm, you will understand the Big Bang and the Black Hole in macrocosm.

2. Lingodbhava Murthy

Many people, who are working to understand the secrets of the Universe, try to raise a doubt, “When there is so much matter generated during the Big Bang, why so much anti-matter is not generated.” The question is wrong, please understand. Matter and anti-matter is always in balance. If any one gets imbalanced, immediately the Big Bang or Black Hole has to happen to balance it. Overflowing matter - overflowing anti-matter need to be in samana for maintenance, means Stithi. From the influence of the anti-matter, matter manifesting is Big Bang. From the influence of the matter, anti-matter manifesting is Black Hole. If there is a sustenance, life perception, matter and anti-matter is balanced. Enough and equal amount of anti-matter also is produced, when matter is produced.

2 Sept 2018, Revelations On Matter - Anti-Matter, Learn About Avyakta (The Unmanifest) The Energy Source Of All Matter

3. Mukhalingam

Paramaśiva clearly defines - all the thought currents, emotions, patterns, which is there in all of us, which is responsible for our functioning, but which is not perceived as material is Anti-matter.

Which is there in all of us - patterns, emotions, thought currents, feelings, experiences... which is responsible for our functioning, our existence, which matters for our existence, but which is not perceived as material - is Anti-matter.

Enough quantity of anti-matter also is released along with matter.

37. Lakulishvara Murthy

Person who understand anti-matter matters for life, starts making the cognitions related to anti-matter.

How much you avoid poison, poisonous food, toxics in your system, that much you need to avoid toxic patterns and poisonous patterns.

But unfortunately, you always recognize matter as existence and never recognize anti-matter. You don't give the due right to the anti-matter in your life and fail, land in accidents and collapse.

If you cognize the higher reality about the anti-matter, your life will be a powerful manifestation of completion, fulfilment, higher form of existence.

The first powerful cognition you need to cognize - “Whatever you perceive as matter, existence of your life - equivalent amount you need to perceive, cognize the anti-matter component of your life.”

Anti-matter, Avyakta, unmanifest drives the matter. Anti-matter is the energy source of the matter. The Avyakta manifests as Vyakta and avyakta continues to be the driving force of the vyakta. Unmanifest continues to remain as the driving force of the manifest.

Theoretical physicists are wondering, they are trying to understand the temperature of Black Hole. If they come to the conclusion there is a temperature, they feel Black Hole may just evaporate at one day and disappear. Then what will happen to the mass and how the memories are carried, how the knowledge is alive without destruction - all these questions they are not able to answer, unfortunately. But very precisely Āgama reveals all this truth. Paramaśiva reveals all these truths in Āgama. In length, breadth, depth - mass has temperature. When it moves to the next dimension of time - it loses all the qualities of temperature. It just becomes just memory, knowledge. Actually, Black Hole is happening in the connecting time and space. The zone where the time and space touching each other - that's where exactly the eye of the Black Hole is there.
